Exemptions from a physical examination, immunizations, and Blood-Lead testing are permitted if the parent has an objection based on their bona fide religious beliefs and practices. The Blood-Lead certificate must be signed by a Health Care Practitioner stating a questionnaire was done.

Children may also be exempted from immunization requirements if a physician, nurse practitioner, or health department official certifies that there is a medical reason for the child not to receive a vaccine.

The health information on this form will be available only to those health and child care providers or child care personnel who have a legitimate care responsibility for the child.

#### **INSTRUCTIONS**

Part I of this Physical Examination form must be completed by the child's parent or guardian. Part II must be completed by a physician or nurse practitioner, or a copy of the child's physical examination must be attached to this form.

If the child does not have health care insurance or access to a health care provider, or if the child requires an individualized health care plan or immunizations, contact the local Health Department. Information on how to contact the local Health Department can be found here: <a href="https://health.maryland.gov/Pages/Home.aspx#">https://health.maryland.gov/Pages/Home.aspx#</a>

#### **HOW TO USE THIS FORM**

The documented tests should be the blood lead tests at 12 months and 24 months of age. Two test dates and results are required if the first test was done prior to 24 months of age. If the first test is done after 24 months of age, one test date with result is required. The child's primary health care provider may record the test dates and results directly on this form and certify them by signing or stamping the signature section. A school health professional or designee may transcribe onto this form and certify test dates from any other record that has the authentication of a medical provider, health department, or school. All forms are kept on file with the child's school health record.

## **How To Use This Form**

The medical provider that gave the vaccinations may record the dates (using month/day/year) directly on this form (check marks are not acceptable) and certify them by signing the signature section. Combination vaccines should be listed individually, by each component of the vaccine. A different medical provider, local health department official, school official, or child care provider may transcribe onto this form and certify vaccination dates from any other record which has the authentication of a medical provider, health department, school, or child care service.

Only a medical provider, local health department official, school official, or child care provider may sign 'Record of Immunization' section of this form. This form may not be altered, changed, or modified in any way.

#### Notes:

- 1. When immunization records have been lost or destroyed, vaccination dates may be reconstructed for all vaccines except **varicella**, **measles**, **mumps**, **or rubella**.
- 2. Reconstructed dates for all vaccines must be reviewed and approved by a medical provider or local health department no later than 20 calendar days following the date the student was temporarily admitted or retained.
- 3. Blood test results are NOT acceptable evidence of immunity against diphtheria, tetanus, or pertussis (DTP/DTaP/Tdap/DT/Td).
- 4. Blood test verification of immunity is acceptable in lieu of polio, measles, mumps, rubella, hepatitis B, or varicella vaccination dates, but **revaccination may be more expedient**.
- 5. History of disease is NOT acceptable in lieu of any of the required immunizations, except varicella.
